

A CLUBFOOT CAN BE TREATED!

1

Clubfoot occurs in about one of every 500 newborns.

2

Clubfoot can be treated non-surgically through the Ponseti method.

3

This method involves weekly plaster casting for 4-6 weeks and wearing of special shoes for the next 3 to 4 years.

If your child is born with Clubfoot, seek **Early** and **Free** treatment

FREE treatment of Clubfoot is available at Clubfoot Clinic, Naga Hospital Authority (NHAK), Kohima.

Open every Tuesday & Thursday from 9 am-12 noon.
